

soothers

soothers

If unsettled or distressed, a Soother can be useful to pacify and calm your baby. Some parents worry that they may mistakenly offer baby a Soother when they are really crying to be fed or are unwell. Don't worry, the Soother will be quickly rejected if baby is hungry, unwell or if it's simply not what is needed at that time.

Cleaning & Care:

For your child's safety, read this information before use and retain for future reference.

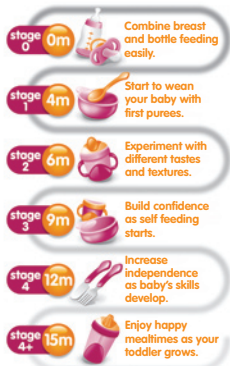

- Flexisafe® shield face and edge for maximum comfort and safety.
- Teat shaped for the natural development of baby's teeth and gums.
- Suitable for sterilising solutions, steam & microwave sterilisers. Follow manufacturer's instructions carefully.
- VITAL BABY® accessories are top rack dishwasher proof and can be sterilised by all sterilising methods. Suitable for use in the microwave oven.

INSTRUCTIONS FOR CARE AND USE IMPORTANT! READ THIS INFORMATION BEFORE USE:

For your baby's safety and health WARNING:

- NEVER attach ribbons or cords to a Soother, your child may be strangled by them
- Inspect Soothers carefully before each use, especially when the child has teeth. Pull the Soother in all directions. Throw away at the first signs of damage or weakness.
- Use only under adult supervision.
- Wash Soothers thoroughly before use and sterilise by boiling in water for at least 5 minutes or use a steam steriliser, microwave steriliser or sterilising solution according to the manufacturer's instructions. Allow 5 minutes for the Soother to cool and remove any trapped water before use.
- Do not use abrasive or solvent based cleaning agents as this may damage the Soother.
- If a Soother becomes lodged in baby's mouth DO NOT PANIC; it cannot be swallowed and is designed to cope with such an event. Remove from the mouth carefully and as gently as possible.
- Keep the clip-on teat cover away from children to avoid suffocation.
- NEVER dip the teat in sweet substances syrups, jam, honey etc. or medication as this can lead to tooth decay.
- NEVER try to take Soothers apart.
- When not in use, keep Soothers in a dry covered container and do not leave in direct sunlight, or near a heat source such as heaters or car interiors or in sterilizing solution, as this may weaken the teat.
- Replace Soothers, regardless of condition, after one or two months of use, for hygiene and safety reasons.

This product conforms to BS EN 14350 standards.
