trainer cups

trainer cups

Our award winning range of Vital Baby Trainer Cups is specially designed to protect sensitive gums, teach how to hold, build confidence and ultimately help to develop baby's drinking skills as they grow.

Every cup comes complete with a non-spill valve which has been cleverly designed to provide a smooth drinking action and a steady flow of liquid from just 4 months old! As baby grows the valve self adjusts to allow more liquid flow... the stronger baby sucks the faster the flow.

To use your cup as "non-spill", insert the valve into the inside of the cup lid by pressing it firmly into place making sure the silicone strap is covering the outlet hole.

Alternatively you can choose to use your cup as "free-flow" by simply removing the valve altogether.

Every Vital Baby Trainer Cup gives you the freedom to choose

INSTRUCTIONS FOR CARE AND USE IMPORTANT! READ THIS INFORMATION BEFORE USE:

Cleaning & Care:

Wash in warm soapy water, rinse in hot water and air dry before using for the first time and after each use.

Vital Baby Trainer Cups are all top rack dishwasher safe and can be sterilised by all sterilising methods. They are all suitable for use in the microwave oven. Do not use abrasive or solvent based cleaning agents as this may damage the Cup. Store in a dry, covered container, out of direct sunlight, when not in use.

For your baby's safety and health WARNING:

- Always use this product under adult supervision.
- Keep all components not in use out of the reach of children.
- Continuous and prolonged sucking of fluids will cause tooth decay – Tooth decay in young children can occur even when non sweetened fluids are used. This can occur if baby is allowed to use the cup for long periods through the day and particularly through the night, when saliva flow is reduced or if it is used as a soother.
- Always check the food temperature before feeding.
- Cups with straws are not suitable for a child under 6 months.

This product conforms to BS EN 14350 standards.
